
Next term's learning journey is *The Tower to the Sun.* This is a book written and brilliantly illustrated by Colin Thompson. We will explore the environmental themes in this, as well as other books by this author and linking them to our English, DT and Science.

<u>Design Technology</u>
To help the engineers build the Tower to the Sun, we are going to be designing and making textile tool belts for them to use!

<u>Maths</u>
We will be consolidating our calculation skills as well as ensuring we are confident with all areas of Maths such as measurement, fractions and shape.

<u>English</u>
We will be doing descriptive writing and looking at how to write a persuasive letter to persuade the owners of world monuments to donate them to the Tower!

<u>Science: Light</u>
We will be investigating how light travels; how to reflect light and how to provide shade for holidaymakers by the poolside!

<u>RE</u>
We will be investigating further Christianity and how it links to other religions and the modern world.

<u>PSHE</u>
Our Jigsaw unit will be called Healthy ME and is all about how to keep yourself physically and mentally healthy and well.

<u>Geography</u>
Finding our way round the world using Ordnance survey maps using 6 figure grid references and compasses.
